

# Pharmacy Discounts

## **GREAT NEWS:**

**Price Edge – will be in place for all members enrolled in pharmacy benefits\*. This program will improve your experience and save money.**

Price Edge is available at no charge and helps you save on covered and non-covered generic medications. It can even help you save money on over-the-counter (OTC) medications if you have a prescription. Medications not covered by your plan, including OTC products, do not count toward your yearly out-of-pocket limit or deductible.

### **How does Price Edge work?**

- You are already set up. Simply show your ID card and a prescription from your doctor at any in-network pharmacy.
- Price Edge may lower copayment costs on certain covered medications. If your next fill qualifies, you will automatically receive a discount.
- If your plan does not cover a medication, Price Edge will offer a lower price at the pharmacy counter. Or ask your doctor if another covered medication is right for you.

### **If your prescription uses a Price Edge discount, you can view the discount on your pharmacy claims.**

- Log in to your **MyBlue<sup>SM</sup>** account at **[azblue.com/MyBlue](https://azblue.com/MyBlue)**.
- Click on the **Pharmacy** tab from your member portal, then select **View my claims**.
- At the bottom of the claim an alert will be displayed: "Your price has been discounted with Price Edge for a competitive low market price."

If you have any questions, call the number on the back of your ID card.

AZ Blue is **making it easier** for members.
